Profile

Cybersecurity and Digital Forensics graduate with hands on experience in SOC operations, incident analysis, and forensic investigations. Skilled in network security, threat detection, log analysis, applied cryptography, and quantum computing fundamentals.

EDUCATION

Bachelor of Cybersecurity and Digital Forensics, 2021 – 2026
Imam Abdulrahman Bin Faisal University Dammam, Saudi Arabia
GPA: 4.6 / 5.0

Professional Experience

Information Protection Analyst (COOP), *Sadara Chemical Company* 2025
Jubail

- Supported SOC operations using **SIEM, NDR, EDR, and XDR** technologies.
- Performed incident analysis, log investigation, and threat detection.
- Assisted in digital forensics tasks and security reporting.

CERTIFICATES

- CompTIA Security+
- INE eCIR (Certified Incident Responder)
- INE eJPT (Junior Penetration Tester)
- INE eWPTv2 (Web Penetration Tester)

PROJECTS

RASD - AI-Based Insider Threat Detection System

- Built a real-time insider threat detection system for Zero Trust cloud environments using Python and AWS.
- Designed a two agent AI architecture: Agent 1 (offline Autoencoder that learns per-user behavioral baselines) and Agent 2 (online XGBoost classifier that scores live events in real time)
- Implemented automatic IAM enforcement across 4 Zero Trust tiers (allow, MFA, deny, session revoke)

Quantum Search Acceleration for Unstructured Network Data

- Developed custom oracle and diffuser gates, executed on real quantum hardware.

Capture the Flag (CTF) Challenge

- Design a CTF competition. Developed challenges in areas such as cryptography, forensics, and web security.

VOLUNTEER

Student Council Member 2023 – 2024

- Served as a student representative for one academic year, advocating for student needs and enhancing campus life.

Cybersecurity Club Member 2024 – 2026

- Assisted in organizing cybersecurity awareness events, workshops(e.g., Wireshark, Nmap, Autopsy), and CTF competitions.
