PROFESSIONAL SUMMARY

Driven Cybersecurity student seeking a Cooperative Training (COOP) opportunity to apply hands-on expertise in security operations, digital forensics, penetration testing, and Governance, Risk, and Compliance (GRC). Backed by a strong academic foundation in cryptography, cloud defense strategies, and machine learning for threat detection. Proven ability to architect and engineer comprehensive security solutions, including real-time Zero Trust cloud environments, to strengthen organizational resilience.

EDUCATION

Bachelor of Science in Cyber Security and Digital Forensics Expected Graduation: June 2026
Imam Abdulrahman Bin Faisal University **GPA: 4.62 / 5.00**

Relevant Coursework: Applied Cryptography, Digital Forensics Techniques, Network Security, Secure Software Design, Advanced Digital Forensics, Quantum Computation & Security, Web Technology & Security, Operating System Security.

ACADEMIC PROJECTS

Rasd: Risk-Adaptive Zero Trust Access Control for Cloud Environments August 2025 – June 2026

- Engineered a cloud-native insider threat detection system integrating behavioral analytics with real-time Zero Trust enforcement for AWS.
- Innovation:** Designed a two-agent AI architecture using Autoencoders and XGBoost machine learning models to achieve low-latency decision-making for proactive security enforcement.
- Technologies:** Python, AWS Lambda, Amazon DynamoDB, AWS CloudTrail, AWS SAM.
- Key Concepts:** Zero Trust Architecture (ZTA), Behavioral Anomaly Detection, Principle of Least Privilege.

TECHNICAL SKILLS

- Security Domains:** Cloud Security, Zero Trust Architecture (ZTA), Digital Forensics, Network Security, Penetration Testing.
- Programming & Scripting:** Python, Java, Bash/Shell Scripting, x86 Assembly, LaTeX.
- Tools:** Nmap, Metasploit, Wireshark, Autopsy, Volatility, Burp Suite, Git.
- Concepts:** Network Authentication (Kerberos), Public Key Infrastructure (PKI), Hashing Algorithms, Symmetric/Asymmetric Cryptography.

CERTIFICATIONS

- eJPTv2** – eLearnSecurity Junior Penetration Tester (INE) February 2026

EXPERIENCE & TRAINING

Cybercrime and Network Forensic Investigation | Tuwaiq Academy June 2025

- Executed network traffic analysis and applied modern cybercrime investigation methodologies over a 45-hour intensive program.
- Managed digital evidence handling protocols and authored comprehensive technical forensic reports.

Cyber Security Bootcamp | National Cybersecurity Authority (NCA), SITE July 2024

- Completed rigorous Network+ and Security+ training, applying defensive concepts in live cyber range environments over 3 weeks.
- Competed in Capture The Flag (CTF) events, successfully solving complex web application and cryptography challenges.

LANGUAGES & SOFT SKILLS

- Languages:** Arabic (Native), English (Professional Proficiency).
- Soft Skills:** Technical Report Writing, Analytical Problem Solving, Team Collaboration, Adaptability, Time Management.
